Arts & Crafts Plan

Paper plate chameleon

Equipment

Paper plates x 2
Paint / colour pens
Split pin
Googly eyes (optional)
Scissors
Glue

Method

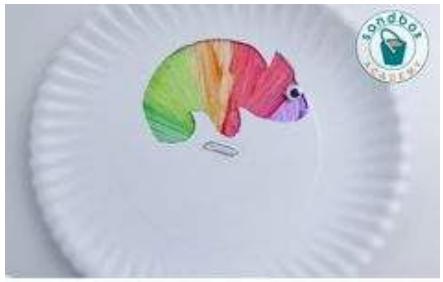

1. On one plate, colour it / paint it so it is covered in lots of different colours and patterns

2. On the other plate draw round the chameleon template. Position the chameleon near the top of the plate, near the rim so it is not covering the middle of the plate.

3. Carefully cut out the inside of the chameleon template. Cut round the eye hole so there is space to stick the googly eye!

4. Using a sharp pencil / scissor end (adult support may be needed), pierce through the centre of each plate.

5. Place the cut out plate on top of the coloured plate. Push a split pin through both plates and open up so it doesn't come back out.

 	6. Hold the bottom plate still and slowly turn the top plate and watch your chameleon change colour!
