

ARTS & CRAFTS PLAN

COFFEE FILTER FISH

EQUIPMENT

Coffee filter paper
Rubber bands
Googly eyes
Felt tip pens
Water spray bottles

METHOD

1. Colour in the coffee filter paper with different patterns - they don't need to worry about gaps as the water will help blend!
2. Once they have finished colouring in, use the water spray bottles to wet the filter paper and cause the felt tip colours to blend together.
3. Leave to dry
4. Once the filter paper is dry, pinch together so that you have a small tail. Fix with a rubber band.
5. If needed, cut round the larger section of the filter paper to make a body.
6. Stick on a googly eye and draw a mouth!
