

ARTS & CRAFTS PLAN

GEORGE'S MARVELLOUS MEDICINE

EQUIPMENT

Potion pots - plastic bottles, jars etc
Glitter
Oil
Food colouring
Other ingredients - find around setting

METHOD

Let children create their own "medicines" using various ingredients!

The main focus of this activity should be '**finding**' ingredients. In the story, George searches all around the house and outside to find weird and wonderful ingredients!

Allow children to explore the indoor and outdoor setting and see what ingredients they can find.

Examples could be:

Pencil sharpenings, Petals, Grass, Glitter, Shredded paper, Leaves, Bits of string

Once they have collected some ingredients, allow them to mix them all together in bowls... they can also use water, food colouring etc to help mix together. Once they are happy with it they can transfer to their bottles etc

On the labels they can decide a name for their medicine and describe what they do!
