

# ARTS & CRAFTS PLAN

## MAKING WANDS

## EQUIPMENT

Pencils (or sticks)  
PVA glue  
Wool / String

Paint  
Glitter

## METHOD

- 1) If you want to use sticks, these will need to be collected!
- 2) Put some glue (e.g. school glue / PVA glue) in a bowl. Add a length of wool or string and coat it in the glue. Then begin wrapping the string around your stick / pencil in whatever way you like. Leave to dry.
- 3) Paint the wand. We found a dark brown colour that looked best, but you can use any colour they want. Simply paint over all of the wood and string. We found one coat was enough. Then leave it to dry again.
- 4) Decorate your wand! You could use normal glue and glitter, or paint, to give your wand a personal touch. You could even add jewels or other items to give your wand more features.
