

ARTS & CRAFTS PLAN

MEDICAL BAGS

EQUIPMENT

A3 Black and a4 white paper
Coloured pens
Scrap materials and junk modelling
Coloured paper

METHOD

Fold the A3 black paper in half.

With another bit of black paper cut two handles by folding a small piece in half and cutting out a semi circle handle. Stick them to the ends of the medical bag.

Stick white paper onto the inside of the medical bag.

On the inside of the bag children can make different bits of medical equipment out of junk modelling and scrap materials - eg stethoscope, plasters, medical tape, wipes, bandages etc.
