

# ARTS & CRAFTS PLAN

## PAPER CUP WINDMILL

## EQUIPMENT

Paper cups  
Split pins  
Card  
Scissors

Felt tips / paint  
Sharp pencil

## METHOD

1. Paint or colour in your paper cup for the base of the windmill. Remember they will be upside down when they are finished!
2. While paint is drying, cut out 2 rectangles out of card - these will be your blades for the windmill.
3. Once the paint is dry, carefully poke a small hole at the bottom of one side of the cup.
4. Turn your cup upside down - so the bottom of the cup (and the hole you just made) are at the top.
5. Decorate the rest of the cup with windows, doors etc
6. Put one rectangle piece of card over the other, so they make a cross shape. Carefully poke a hole through the middle of both with scissors or a pencil.
7. Once you have a hole, push the split pin through the 2 pieces of card and then through the hole in

your cup.

8. Fold out the ends inside the cup to secure. Your blades should be able to turn!
