Science Plan

Bug hotel

Equipment

Milk bottles	Pine cones
Twigs	Grass
Moss	Toilet rolls
Cardboard	Scissors
Wool	Decorative bits

Method

Allow children to collect lots of stuff from outside that could fill the bug hotels

Cut a large section out of the milk bottle.

Children can decorate the outside of their bug hotels if they want to

Stuff the milk bottles with lots of bits from outside - try to create layers and sections that the bugs can crawl into and hide. It will need to be stuffed full so stuff doesn't fall out.

Add a sign saying bug hotel so the bugs know where to go!
