Science Plan

Egg Box Bird Feeder

Equipment

Egg cartons
String
Lard
Birdseed

Method

(Can be in groups if hanging in school)

1. Allow children to decorate the outside of the egg boxes
2. Pierce 2 holes through the middle cones and thread a long piece of string through to create a handle to hook on a tree.
3. Smear the whole of the inside of the egg box with lard to create a thick layer
4. Sprinkle the birdseed over the lard, pushing some in where needed.
5. If allowed by the school hang them feeders outside on the playground, or if doing individual ones they can take them home.
