Science Plan

Giant bubbles

Equipment

5 litres of warm water
500ml Fairy washing up liquid
100ml glycerine
10 tablespoons of white sugar

Method

Method

1. Pour the warm water into a large bucket or storage tub.
2. Stir in the sugar until completely dissolved.
3. Add the glycerine and mix gently.
4. Slowly pour in the Fairy Original, stirring carefully to avoid creating lots of foam.
5. Leave to stand for **20–30 minutes** while the children make bubble wands or complete another activity.

Top Tips

- ✅ Stir gently – don't whisk or shake.
- ✅ Use warm water to help dissolve the sugar.
- ✅ The less foam you create, the better the bubbles.
- ✅ Keep the mixture in the shade when using it.
- ✅ If possible, make it first thing in the morning so it has time to settle before use
