Science Plan

Invisible ink

Equipment

½ cup of water
1 tbsp of baking soda
Paper
Cotton buds
Plastic spoons
½ cup of Rubbing alcohol
1 tsp turmeric
Plastic cups
Paintbrush

Method

1. Mix the baking soda into ½ cup of water - this makes the invisible ink!

2. Using a cotton bud, dip into the cup of water and baking soda and write your secret message or picture onto the piece of paper.

3. While you are waiting for the paper to dry, mix the teaspoon of turmeric with ½ cup of rubbing alcohol in a different cup.

4. Stir the mixture well. Be careful as the turmeric can stain hands.

5. After the paper is dry, use a paint brush to brush the turmeric mixture over it to reveal the message or picture!
